

Rhinzebaraph

Think back to yesterday and our work on the Sneaglegator – we learnt about a new animal and found out an incredible amount of information.

Today you must invent your own animal and I should be able to learn as much about it as I did about the Sneaglegator.

Write in full sentences and use adjectives, similes and metaphors to help add detail.

Picture

Appearance

The Rhinzebaraph is a mix of three animals these are the animals Rhino, zebra and an ^{giraffe} giraffe. It has a long neck, a little tail also a big belly and midget legs also long toe nails.

Habitat

They live in a very big ^{field} field in Mexico and they stay in that ^{field} because that is where ^{where} they get all of there ^{their} heat.

Young/Babies

Baby Rhinzebaraph is called a juvinille and it doesn't have fluff on its tail like the mum because if they did they might get hurt.

Diet

A Rhinzebaraph eats grass, leaves and trees. They eat it with a big mouth full. They are carnivores because they do eat the odd few birds but there still herbivores. ^{they are} that makes them omnivores.

*Omnivores eat both meat and grass etc.

population.

The amount of Rhinzebaraphs in the world are at least 20000 and 50000 they live in Mexico because they like hot countrys.
