10	10	20	30	40	50	60	70	80	90	100

Divisibility Rules

11.	A number is divisible				
	by:		if:		
	2		The last digit is divisible by 2		
	3		The sum of the digits is divisible by 3		
	4		The number made by the last two digits is divisible by 4		
	5		The last digit is 5 or 0		
	6		The number is divisible by 2 and 3		
	8		The number made by the last 3 digits is divisible by 8		
	9		The sum of its digits is divisible by 9		
	10		The last digit is 0.		
12.	Operations	Symbols and words to show how to combine numbers.			
		×	Multiply	+	Add
		÷	Divide	−	Subtract
13.	Inverse Operations	The operation used to reverse the original operation			
		+ and − are inverse		× and ÷ are inverse	
		Finding the square root is the inverse of finding the square of a number.			
		Finding the cube root is the inverse of finding the cube of a number.			

14.	Order of operations	The order in which operations should be done.	B I DM AS	Brackets Indices Divide and Multiply Add and Subtract
15.	Integer	A whole number that is can be positive, negative or zero.		
16.	Decimal	A number with a decimal point in it, which can be negative or positive.		
17.	Rounding	Changing a number to a simpler, easy to use value.		
18.	Approximate	An easier figure to use close to the value.		
19.	Multiple	The result of multiplying a number by an integer.		
20.	Factor	A number that divides into another number without a remainder.		
21.	Prime number	A number with exactly two factors; 1 and itself.		
22.	Prime numbers	2, 3, 5, 7, 11, 13, 17, 19, 23, 29, 31, 37, 41, 43, 47, 53, 59, 61, 67, 71, 73, 79, 83, 89, 97.		
23.	Product	The answer when two or more numbers are multiplied together.		
24.	Prime factor decomposition	Writing a number as a product of its prime factors.	 <p> $60 = 2 \times 2 \times 3 \times 5$ $60 = 2^2 \times 3 \times 5$ </p> <p> $72 = 2 \times 2 \times 2 \times 3 \times 3$ $72 = 2^3 \times 3^2$ </p>	
25.	Highest common factor	HCF	The highest number that divides exactky into two or more numbers.	e.g. the HCF of 12 and 24 is 12
26.	Lowest common multiple	LCM	The smallest positive integer that is a multiple of two or more numbers.	e.g. the LCM of 12 and 24 is 24
27.	Negative number	A number that is less than zero.		

28.	Negative number rules	When multiplying or dividing with numbers that include negative numbers the following applies:	$\begin{matrix} (+) \times (+) = (+) \\ (+) \times (-) = (-) \\ (-) \times (+) = (-) \\ (-) \times (-) = (+) \end{matrix}$	$\begin{matrix} (+) \div (+) = (+) \\ (+) \div (-) = (-) \\ (-) \div (+) = (-) \\ (-) \div (-) = (+) \end{matrix}$
29.	Ascending order	A set of numbers arranged from smallest to biggest.		
30.	Descending order	A set of numbers arranged from biggest to smallest.		
31.	Square numbers	The product of a number multiplied by itself.	4  2^2 or $2 \times 2 = 4$	
32.	Cube numbers	The product of multiplying a number by itself three times	$2^3 = 2 \times 2 \times 2 = 8$ 	
33.	Triangular numbers	Numbers that can make a triangular dot pattern.		

Analysing and displaying data

Definitions

34.	Qualitative	Data described by words.
35.	Quantitative	Data that is in number form that can be discrete or continuous.
36.	Discrete	Data that can be counted and has a finite number of possible values.
37.	Continuous	Data that can be measured and has an infinite number of possible values within a range.

Averages and Measures of central tendency

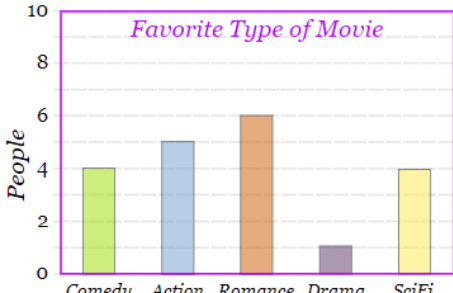

38.	Mode	The value that occurs most often.
39.	Range	The largest value minus the smallest value.
40.	Median	The middle value when the numbers are in ascending order.
41.	Mean	Add up all the amount. Divide by how many values there are.

Averages from frequency tables

42.	Modal class	The class with the highest frequency
-----	-------------	--------------------------------------

43.	Median	If the total frequency is n , then the median lies in the class with the $\frac{n+1}{2}$ th value in it.																								
44.	Mean from a frequency table <div>Times \rightarrow Add $\downarrow \downarrow$ Divide \leftarrow</div>	<div>No of make-up items in handbags</div> <table><tr><th>No of Items x</th><th>Freq f</th><th>$f \times x$</th></tr><tr><td>1</td><td>7</td><td>$1 \times 7 = 7$</td></tr><tr><td>2</td><td>2</td><td>$2 \times 2 = 4$</td></tr><tr><td>3</td><td>1</td><td>$3 \times 1 = 3$</td></tr><tr><td>4</td><td>4</td><td>$4 \times 4 = 16$</td></tr><tr><td>5</td><td>2</td><td>$5 \times 2 = 10$</td></tr><tr><td colspan="2">16</td><td>40</td></tr></table> <div>Mean = $\frac{40}{16} = 2.5$</div>	No of Items x	Freq f	$f \times x$	1	7	$1 \times 7 = 7$	2	2	$2 \times 2 = 4$	3	1	$3 \times 1 = 3$	4	4	$4 \times 4 = 16$	5	2	$5 \times 2 = 10$	16		40			
No of Items x	Freq f	$f \times x$																								
1	7	$1 \times 7 = 7$																								
2	2	$2 \times 2 = 4$																								
3	1	$3 \times 1 = 3$																								
4	4	$4 \times 4 = 16$																								
5	2	$5 \times 2 = 10$																								
16		40																								
45.	Estimated mean from a grouped frequency table <div>Times \rightarrow Add $\downarrow \downarrow$ Divide \leftarrow</div>	<table><tr><th>Class Interval</th><th>Mid-point</th><th>Frequency</th><th>Mid-point \times Frequency</th></tr><tr><td>$140 \leq h < 150$</td><td>145</td><td>6</td><td>$145 \times 6 = 870$</td></tr><tr><td>$150 \leq h < 160$</td><td>155</td><td>16</td><td>$155 \times 16 = 2480$</td></tr><tr><td>$160 \leq h < 170$</td><td>165</td><td>21</td><td>$165 \times 21 = 3465$</td></tr><tr><td>$170 \leq h < 180$</td><td>175</td><td>8</td><td>$175 \times 8 = 1400$</td></tr><tr><td colspan="2">Totals</td><td>51</td><td>8215</td></tr></table> <div>Mean = $8215 \div 51$ = 161.07843... = 161.08 (2dp)</div>	Class Interval	Mid-point	Frequency	Mid-point \times Frequency	$140 \leq h < 150$	145	6	$145 \times 6 = 870$	$150 \leq h < 160$	155	16	$155 \times 16 = 2480$	$160 \leq h < 170$	165	21	$165 \times 21 = 3465$	$170 \leq h < 180$	175	8	$175 \times 8 = 1400$	Totals		51	8215
Class Interval	Mid-point	Frequency	Mid-point \times Frequency																							
$140 \leq h < 150$	145	6	$145 \times 6 = 870$																							
$150 \leq h < 160$	155	16	$155 \times 16 = 2480$																							
$160 \leq h < 170$	165	21	$165 \times 21 = 3465$																							
$170 \leq h < 180$	175	8	$175 \times 8 = 1400$																							
Totals		51	8215																							
46.	Estimate of range from grouped frequency table	The maximum possible value minus the smallest possible value.																								

Displaying data

47.	Two way table	A table that can be used to compare two discrete data sets.	<table><tr><th colspan="4">What is your favorite sport to watch on television?</th></tr><tr><th></th><th>Football</th><th>Basketball</th><th>Baseball</th></tr><tr><td>Males</td><td>40</td><td>22</td><td>15</td></tr><tr><td>Females</td><td>12</td><td>16</td><td>45</td></tr><tr><td>Total</td><td>52</td><td>38</td><td>60</td></tr></table>	What is your favorite sport to watch on television?					Football	Basketball	Baseball	Males	40	22	15	Females	12	16	45	Total	52	38	60
What is your favorite sport to watch on television?																							
	Football	Basketball	Baseball																				
Males	40	22	15																				
Females	12	16	45																				
Total	52	38	60																				
48.	Pictogram	A chart that uses pictures to represent quantities. Must include a key.	<div><p>Apples Sold</p><table><tr><td>Jan</td><td></td></tr><tr><td>Feb</td><td>   </td></tr><tr><td>Mar</td><td>  </td></tr><tr><td>Apr</td><td> </td></tr></table><p> = 10 Apples  = 5 Apples</p></div>	Jan		Feb	   	Mar	  	Apr	 												
Jan																							
Feb	   																						
Mar	  																						
Apr	 																						
49.	Bar chart	A chart to display discrete data where the height of the bar shows the frequency.	<div><p>Favorite Type of Movie</p><table><thead><tr><th>Movie Type</th><th>People</th></tr></thead><tbody><tr><td>Comedy</td><td>4</td></tr><tr><td>Action</td><td>5</td></tr><tr><td>Romance</td><td>6</td></tr><tr><td>Drama</td><td>1</td></tr><tr><td>SciFi</td><td>4</td></tr></tbody></table></div>	Movie Type	People	Comedy	4	Action	5	Romance	6	Drama	1	SciFi	4								
Movie Type	People																						
Comedy	4																						
Action	5																						
Romance	6																						
Drama	1																						
SciFi	4																						

50.	Dual bar chart	A bar chart used to compare data sets where bars are drawn next to each other to compare heights.	<p>Rainfall in London and Bristol</p> <table><thead><tr><th>Month</th><th>London (cm)</th><th>Bristol (cm)</th></tr></thead><tbody><tr><td>Jan</td><td>45</td><td>48</td></tr><tr><td>Feb</td><td>20</td><td>15</td></tr><tr><td>March</td><td>30</td><td>32</td></tr><tr><td>April</td><td>40</td><td>45</td></tr><tr><td>May</td><td>15</td><td>10</td></tr></tbody></table>	Month	London (cm)	Bristol (cm)	Jan	45	48	Feb	20	15	March	30	32	April	40	45	May	15	10
Month	London (cm)	Bristol (cm)																			
Jan	45	48																			
Feb	20	15																			
March	30	32																			
April	40	45																			
May	15	10																			
51.	Composite bar chart	A bar chart where bars are split to show the different quantities within each bar.	<table><thead><tr><th>Month</th><th>Blueberry</th><th>Cherry</th><th>Lime</th></tr></thead><tbody><tr><td>January</td><td>40</td><td>70</td><td>10</td></tr><tr><td>February</td><td>20</td><td>60</td><td>10</td></tr><tr><td>March</td><td>60</td><td>90</td><td>10</td></tr></tbody></table>	Month	Blueberry	Cherry	Lime	January	40	70	10	February	20	60	10	March	60	90	10		
Month	Blueberry	Cherry	Lime																		
January	40	70	10																		
February	20	60	10																		
March	60	90	10																		
52.	Times series graph	A line graph that has time plotted on the horizontal axis.	<table><thead><tr><th>Month</th><th>Number of pairs of shoes sold</th></tr></thead><tbody><tr><td>January</td><td>110</td></tr><tr><td>February</td><td>85</td></tr><tr><td>March</td><td>78</td></tr><tr><td>April</td><td>95</td></tr><tr><td>May</td><td>90</td></tr><tr><td>June</td><td>120</td></tr></tbody></table>	Month	Number of pairs of shoes sold	January	110	February	85	March	78	April	95	May	90	June	120				
Month	Number of pairs of shoes sold																				
January	110																				
February	85																				
March	78																				
April	95																				
May	90																				
June	120																				

Expressions, Functions and Formulae

1.	Expression	A mathematical statement written using symbols, numbers or letters.
2.	Equation	A statement showing that two expressions are equal.
3.	Identity	An equation that is true for all values of the variables. An identity uses the symbol: \equiv
4.	Formula	Shows the relationship between two or more variables
5.	Function Machine	Takes an input value, performs some operations and produces an output value.
6.	Function notation	$f(x)$ x is the input value $f(x)$ is the output value.

Algebraic notation

7.	Variable	A letter used to represent a number.
	Coefficient	A number in front of a variable. Written as fractions rather than decimals.
	Term	One part of an expression/equation/formula. Can involve multiplying and dividing coefficients and variables. Separated from other terms by addition or subtraction,
	Adding Terms	$3y$ in place of $y + y + y$ and $3 \times y$
	Multiplying Terms	a^2 in place of $a \times a$ a^3 in place of $a \times a \times a$ a^2b in place of $a \times a \times b$
	Dividing Terms	a/b in place of $a \div b$

8.	Simplifying Expressions	Collect 'like terms'.
9.	Expand	To expand a bracket, multiply each term in the bracket by the expression outside the bracket.
10.	Factorise	The reverse of expanding. Factorising is writing an expression as a product of terms by 'taking out' a common factor.
11.	Substitution	Replace letters with numbers.
12.	Writing Formulae	Substitute letters for words in the question.

Decimals and measures

Decimals

13.	Place Value	<div>The value of a digit depending on its place in a number.</div> <table><tr><td>Millions</td><td>Hundred thousands</td><td>Ten thousands</td><td>Thousands</td><td>Hundreds</td><td>Tens</td><td>Units</td><td>.</td><td>Tenths</td><td>Hundredths</td><td>Thousandths</td></tr></table>	Millions	Hundred thousands	Ten thousands	Thousands	Hundreds	Tens	Units	.	Tenths	Hundredths	Thousandths
Millions	Hundred thousands	Ten thousands	Thousands	Hundreds	Tens	Units	.	Tenths	Hundredths	Thousandths			
14.	Decimal	A number with a decimal point in it, which can be negative or positive.											
15.	Decimal Place	The position of a digit to the right of a decimal point.											
16.	Recurring Decimal	A decimal number that has digits that repeat forever.											
17.	Rounding	Changing a number to a simpler, easy to use value.											
18.	Significant Figure	The significant figures of a number are the digits that carry meaning.											
19.	Error Interval	A range of values that a number could have taken before being rounded or truncated.											

20.	Lower Bound	The smallest value that would round up to the estimated value
21.	Upper Bound	The smallest value that would round up to the next estimated value.
Measures		
22.	Metric System	A system of measures based on the metre for length, the kilogram for mass and the litre for capacity.
23.	Imperial System	A system of measures based on the inch, foot, yard and miles for length; the pound, ounce and stone for mass; and the pint and gallon for capacity.
24.	Length	The measurement of how long an object is.
25.	Mass	The measurement of how much matter is in an object.
26.	Capacity	The measurement of how much an object can hold.
27.	Scale	The ratio of the length in a model to the length of the real thing.
28.	Coordinates	Written in pairs. The first term is the x-coordinate (movement across). The second term is the y-coordinate (movement up or down)
29.	Perimeter	The total distance around the outside of a shape.
30.	Area	The amount of space inside a shape defined in square units.
